THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

1. Diplom Ingenieur Kurt Maedebach had been employed at the Flugtechnische Institut (Aeronautical Institute) in Pirna since 1953. The institute had the cover name of "Institut fuer Industrie-ervertung" or something similar. It is believed that the institute, which was still under construction, was actually to serve as testing installation for the KVP Luft. Maedebach engaged in development work in connection with his former occupation in the field of material development. The same applied to Ingenieur Teuchert, a motor specialist, who lived in the same building as Maedebach.
2. On 20 January 1955, the former aircraft constructing engineer with the Azado firm, Schmoldt, who worked with the ZEH Berlin prior to the date mentioned, started work with the technological department of the Pirna institute. It is therefore assumed that development work in Pirna also included power plants.

1 Washington Comment: Not further identified.
